“Software innovation, like almost every other kind of innovation, requires the ability to collaborate and share ideas with other people, and to sit down and talk with customers and get their feedback and understand their needs”

- Bill Gates

Datamation Systems has been successfully providing business solutions since 1986. We are a software development firm with a mission of providing innovative services and solutions and a vision of serving clients locally and across the globe. Cushion and protect your business with FiNAC Furniture and Fixtures Management System

FiNAC Ceramic Tile & Fitting Management System

HARDWORKING SOFTWARE.

The FiNAC Furniture and Fixtures Management system is distinctive. We created it that way.

It is an exceptional Datamation Furniture and Fixtures Management system, developed with a focus to add value to your business. Our commitment to the furniture and fixtures industry is an outcome of our extensive understanding of all processes and practical day-to-day software requirements.

Software must be custom-made and ship shaped for businesses to excel uninterrupted. With our wealth and knowledge of experience, we will ensure that your software works hard for you. For over three decades we have continuously developed modules for a variety of sectors including the furniture and fixtures industry.

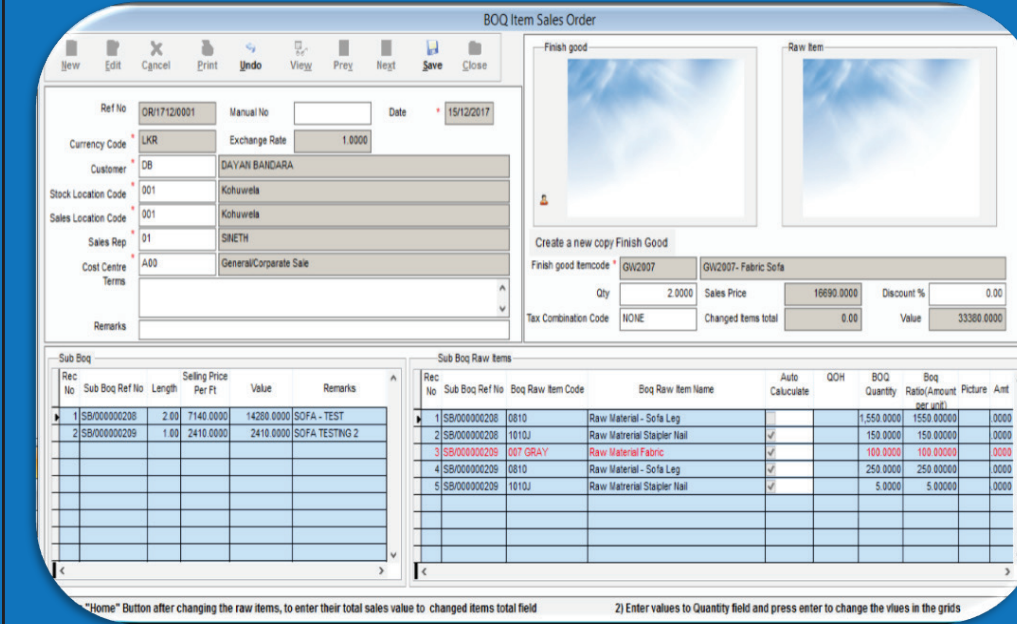

It is time to explore Datamation's FiNAC Furniture and Fixtures Management system, created for the furniture and fixtures industry. Take control.

Furniture and fixtures industries are increasingly stressed with global pressure to find new efficiencies. Sensitive pricing, unpredictable raw material costs, labor demands, and customer demands for more configured product options continue to wear down already thin margins. To keep up with customer requirement, furniture manufacturers are offering greatly expanded product lines and customizable options. The wide variety of materials, colors, fabrics, dimensions, finishes, and customizable options are requiring increased demands from information systems to provide the functionality and flexibility required to address all business requirements. Your organization requires a resource planning system that understands these challenges in the industry. With FiNAC Furniture and Fixtures Management System your business will have everything in place, creating visibility across your entire operation whatever your profile might be- distributor, wholesaler or retailer.

FiNAC Furniture and Fixtures Management System is a thoroughbred manufacturing software which is exclusively designed to support the manufacturing of office, case goods, seating, commercial, upholstered, and customized furniture. The solution can increase your sale and manage your demand by providing your organization with real-time information anytime and anywhere, managing bill of materials (BOM/BOQ), volume discount slabs, free issues schemes and complex pricing structures. Customer satisfaction is ensured with effective control on returns, exchanges and repeat orders. Whether choosing the wood, determining the fabric options for a cubicle, or selecting edge treatments, FiNAC Furniture and Fixtures Management System is designed to optimize supply chain efficiency, streamline production to speed up delivery and enable strategic financial planning, helping you compete and win in the furniture manufacturing industry.

FiNAC Furniture and Fixtures Management System Features:

- Maintain raw material stock / finished goods with multiple conversion of unit of measure (meters to sq.meter)
- Ability to maintain multiple locations. (stores, raw material / finished goods damage store etc)
- User defined stock reorder levels and quantities
- Customized sales order
- Multiple sub BOQ facility for a single job.
- Ability to forecast raw material availability based on BOQ
- Ability to accommodate last moment fabric changes in BOQ for sales order
- Duplicate BOQ details for a new finish good
- Customer order – job entry raised based on the BOQ and sub BOQ
- Production order along with required raw materials
- Deduction of raw materials utilization will be based on BOQ, when finished good note is raised
- Stock variance adjustments (addition and deduction) are raised automatically based on the actual quantity utilized in manufacturing against BOQ quantity
- Job costing with labor cost / overheads & other expenses
- Multiple invoices for single sales order.
- Partial delivery facility
- Actual vs budget stock report base on the BOQ
- Integrate with FiNAC ERP system/ oracle
